Scissors are probably THE most used tool in our profession. The wide variety of shears on the market today can be very confusing. Whether you are a new groomer or you have been grooming for twenty years, this dvd will guide you in buying shears and/or help you add to your collection. Choosing and using the proper shear for each coat type will help you achieve the best finish in a shorter amount of time with ease, eliminating undo strain on your body. Learn proper shear maintenance as well as adjusting your tension. Jodi will discuss the differences in shears as well as the differences in cutting edges. A live scissoring demonstration will teach you how to hold your shears correctly as well as a variety of techniques to improve your scissoring skills.
